

GRADE VERIFICATION SHEET

N.E.W. Apple Corps FIRST Robotics Team

In an effort to help our team members balance academics with their involvement on the robotics team, we are requesting that they submit a grade verification sheet. Those students whose grades are slipping throughout the course of the year will be given additional assistance by other students or by the teachers and engineers on the team.

Team member grades also determine their eligibility to participate in team activities and attend competitions. We have made it clear that make-up work must be submitted to teachers prior to departure for the competitions. If this does not occur, feel free to make note of that in the comments area.

Thank you for your assistance. If you have any additional concerns please don't hesitate to contact us directly.
